

Behnam,

I want to thank you for your commitment to producing results. Your direct, no-nonsense approach works and it works really well!

As I was doing my business plan last year and I realized I was ready to take my business to a much greater level of profit and productivity. I had had the right team and the systems in place to do it and I still was not doing the numbers I projected.

After meeting with you, I was confident that you help me identify the missing elements and get my business on track to an even more satisfying and profitable year. It was one of the best business decisions to date! After one month coaching and consulting my business shifted dramatically.

My team and I are producing even better results than I'd hoped. We are not only going to meet the high targets I set for this year, we are going to exceed them. We are making more money, having more fun and using less time than before.

Thank you again for results that I can take to the bank.

Regards,

Chris Heller
